SELECTED PROJECT

Commercial Decision-Support System for SMEs
Master's Thesis

- Designed and validated an end-to-end decision-support system to improve commercial decision-making in SMEs using real business data.
- Built an analytical workflow covering data integration, quality control, exploratory analysis, customer segmentation, association rules, and explainable product recommendation.
- Developed an automated data pipeline to structure, prepare, and standardize commercial data for reproducible analysis and dashboard reporting.
- Created a Power BI dashboard to translate analytical outputs into actionable insights for non-technical business users.
- Focused on turning raw commercial data into practical tools for customer understanding, cross-sell opportunities, and data-driven decision-making.

RELEVANT WORK EXPERIENCE

Independent E-commerce & Growth Projects
2018 – Present (currently paused)

- Built and managed small-scale e-commerce and digital growth initiatives, working across paid acquisition, funnel optimization, email marketing, and performance tracking.
- Worked with tools such as Google Analytics, Meta Ads, Google Ads, and Klaviyo to analyse audience behaviour, campaign performance, and conversion improvement opportunities.
- Developed a practical understanding of how marketing and customer data can support acquisition, retention, and business growth decisions.
- Currently paused while transitioning toward analytics-focused roles.

Shift Manager I Joe & The Juice I Zurich, Switzerland
Oct 2023 – Dec 2025

- Coordinated daily operations, shift planning, team execution, and KPI monitoring in a fast-paced customer-facing environment.
